

## A Woman Owned, Small Disadvantaged Business, DBE

I'm Stephanie Loud, owner of Mountain West Precast dba Mountain West Construction Group; a Woman-Owned Small Business. Mountain West is a proven performer and I have great pride in the fact that we have built such a diverse clientele of satisfied Federal, Public and Private customers. Establishing and maintaining relationships are the most important part of my business. My goal is to discover what my client's needs and desires are and then to do what it takes to make it happen. Those values are what have made Mountain West what it is today.

## CORE CAPABILITIES:

- DESIGN/BUILD
- CM/GC
- NEW CONSTRUCTION
- RENOVATIONS / UPGRADES
- PRECAST CONCRETE FABRICATION
- FEDERAL CONTRACTING
- IDIQ CONTRACTS
- HISTORICAL RENOVATIONS
- BIOLOGICAL TEST CHAMBERS
- INDUSTRIAL CONSTRUCTION
- COMMERCIAL CONSTRUCTION
- TRANSPORTATION INFRASTRUCTURE

## SATISFIED CUSTOMERS:

- US AIR FORCE

## **KEY PROJECTS:**

### **Consolidated Fire Safety and Security Building**

Fort Carson, Colorado

- \$14,300,568
- New Construction, LEED® Certified
- DoD mission critical project performed on a secure base
- Stephanie Padilla; Stephanie.e.padilla@usace.army.mil 719 526-6255

Mountain West has been awarded the competitively bid Consolidated Fire, Safety, and Security Facility in support of the 4th Infantry Division, Combat Air Brigade at Butts Army Airfield at Fort Carson, Colorado. This facility includes apparatus bays, residential areas, administration areas, records and evidence storage areas, detention, interview and processing area, Intrusion Detection System (IDS) installation; and a 911 call center. Sustainability and energy features are included.

### **Design-Build 9 Hayman Type Munitions Storage Magazines**

Hill AFB, Utah

- \$8,099,863
- Munitions Storage Magazines
- Design/Build
- Tim Willard, USACE 801-586-3219

Project includes the design and construction of 9 separate precast munitions storage magazines. Mountain West provided the concrete panels for the project. This project is performed in the Munitions and Missile Storage (MAMS) area of Hill AFB with additional security and safety requirements. The design of this project was approved by the Department of Defense Explosives Safety Board (DDESB), a critical milestone in the project.

### **Relocate/Modify C-130 Depot Level Maintenance Stands**

Hill AFB, Utah

- \$757,791
- Design/Detail/Fabricate mobility kits
- Work performed in a fully operational aircraft maintenance facility
- Burk Stevens, USAF 801-777-8183

The project was is a direct award (negotiated) contract with Mountain West Precast and HHI Corporation, JV. The scope of work is to label, document, dismantle, move, modify, modularize, and store four each C-130 work stands and fuel ventilation systems (yellow pipes) currently located in Building 680, Hill AFB, and place into contractor provided off-base storage of 20,000 SF. The project also requires the contractor to design and fabricate a C-130 stand mobility kit and to update original design drawings to reflect current and as-built conditions.

### **Shorline Protection/Abutment.Replacement**

Liberty, Utah - private residence

- \$45,169
- Bridge Renovation
- Shoreline Protection Upgrade
- Brett Kearl, PM 435-553-1313

The project required the renovation of a failing bridge in a waterway. Also required shoreline protection retaining walls. The shoreline work included removal of walls, sitework, excavation, and slope protection. Mountain West Construction provided Redi-Rock retaining wall engineered gravity blocks, projects oversite, bridge surfacing and materials. The river was dry during construction. This required a tight schedule. before spring runoff watered the channel again.
